

HighJump Software Announces PeopleSoft Integration Certification

HighJump Integration Certified for Use With PeopleSoft Supply Chain Management 8.8; HighJump Continues to Deliver Integrations for Joint Customers

HighJump Software, a 3M company, a global leader in providing highly adaptable, best-of-breed supply chain execution (SCE) solutions, today announced that PeopleSoft, the world's second-largest provider of enterprise application software, recently completed certification testing of the integration between HighJump's Data Collection Advantage 5.0 solution with PeopleSoft Enterprise Supply Chain Management 8.8. As a result, HighJump's Supply Chain Advantage integration for use with PeopleSoft 8.8 is the first supply chain execution integration certified by the PeopleSoft Partner Integration Team for the latest version of the PeopleSoft product. This achievement is a direct result of the collaboration between the two companies, which have partnered since 1996 to design, develop and continually enhance their respective integrated product offerings.

This certification continues HighJump's history of being the only PeopleSoft Certified Software Partner offering certified and tested integrations for all releases of PeopleSoft Enterprise Supply Chain Management starting with version 7.5. HighJump is positioned to immediately meet the needs of PeopleSoft Enterprise 8.8 Supply Chain Management customers with pre-configured transactions for common distribution center, shop floor and labor productivity functions. The integrated products, when used together, give joint customers a solution focused on achieving low total cost of ownership.

"PeopleSoft and HighJump continue to work together to meet customers' needs. HighJump has created a comprehensive, RFID-enabled product suite that tightly integrates with PeopleSoft's industry-leading supply chain solutions," said John Webb, vice president of product strategy, PeopleSoft Supply Chain Management. "PeopleSoft and HighJump are enabling customers to link remote inventory locations, reduce counting times and eliminate paper-based processes - ultimately improving replenishment accuracy."

"We have a collaborative relationship with PeopleSoft in that our developers, during the creation of a new release, endeavor to develop seamless integration and forward-thinking functionality that will effectively meet customer needs," said Chris Heim, president, HighJump Software. "HighJump's long-term relationship with PeopleSoft has resulted in many integrated offerings that directly benefit our joint customers."

About HighJump Software, a 3M Company

HighJump Software, a 3M company, is the global leader in providing highly adaptable, best-of-breed supply chain execution solutions that streamline distribution from the point of source through consumption. HighJump's tightly integrated solutions empower operational excellence in the warehouse and optimize the flow of inventory throughout the supply chain by facilitating collaboration with customers, suppliers and trading partners. These comprehensive solutions combine robust, standard functionality; a best practices-based implementation methodology; and a uniquely adaptable architecture that facilitates fast, cost-effective system modifications. The result: the industry's lowest total cost of ownership for more than 700 satisfied customers worldwide. As part of the 3M family, HighJump leads the industry in financial strength and delivers on an unmatched commitment to innovation and quality. HighJump leverages these advantages to continually expand its solution footprint and empower operational excellence for domestic and multinational customers.
