

New 3M Connector Designed for Residential and Commercial Projects

Designed specifically for use in residential and commercial construction projects, the 3M wire connector 412 will accept up to four #12 solid or stranded wires and has a range of #22 to #8 wires. It is tan with a hexagon-shaped head and a wider spring opening that enables easier and faster insertion of larger wire combinations.

This molded connector - the newest from 3M - resists warping and expansion even when pushed to the upper limits of its wire ranges. The wing design and quick-biting spring make it easy to apply and back off. It can be installed with 3M WCD-P and WCD-H wire connector drivers or a 5/16-inch socket driver. It is available in bags, boxes, jugs and kegs.

For more information about the 3M wire connector 412, contact the 3M Electrical Markets Division, A130-4N-36, 6801 River Place Blvd., Austin, TX 78726-9000, USA, or call 1-800-245-3573. For more information about 3M electrical products, go to www.3M.com/electrical.

3M Electrical Products

The 3M Electrical Markets Division, based in Austin, Texas, designs, manufactures and markets products for electrical construction, industrial maintenance, utility and industrial power businesses, and electrical/electronic devices produced by original equipment manufacturers. Division products include electrical and electronic specialty insulating tapes; electrical wire connectors; wire terminals, tools and lugs; power cable splices and terminations, including cold and heat shrink technologies; cable arc and fire-resistant tapes; heat shrinkable tubing and molded shapes for electrical insulation; wire marking products; cable ties; underground/underwater electrical system products; and electrical diagnostic and detection products.
