

New 3M Dynatel ADSL Qualification Test Set Provides Low-Cost Solution for POTS Testing and ADSL Verification

A new test set from 3M helps service providers ensure that they can deliver enhanced telecommunications services such as fast Internet, data access and videoconferencing. The portable, low-cost 3M Dynatel qualification test set 950ADSL provides a simple, low-cost solution for POTS testing and verification of ADSL modem connectivity at customer locations.

Using the set, technicians can conduct POTS autotest (including loss, noise, power-influence, longitudinal balance, voltage, loop-current and ground-resistance tests) which can be stored and uploaded to a computer. The Dynatel test set also provides ADSL modem linkup and essential performance measurements, such as connect rates, error statistics and bin-graphs, as well as the ability to ping to an ISP. ADSL test results can be saved and viewed in the unit or uploaded to a computer.

The portable, handheld test set weighs less than 2.5 pounds and is housed in a durable case for rugged field conditions.

For more information on the 3M Dynatel qualification test set 950ADSL, call 1-800-426-8688, or for more information on 3M Dynatel products, go to www.3M.com/Dynatel.

3M Telecommunications

3M telecommunications products, technologies and services allow the world's service providers to offer high bandwidth connectivity from the central office into the customer premises with complete network solutions. The company's focus consists of technologies and services in telecom access and enterprise networks, as well as optical fiber components for telecommunications OEMs.

About 3M - A Global, Diversified Technology Company

Every day, 3M people find new ways to make amazing things happen. Wherever they are, whatever they do, the company's customers know they can rely on 3M to help make their lives better. 3M's brands include Scotch, Post-it, Scotchgard, Thinsulate, Scotch-Brite, Filtrete, Command and Vikuiti.
