

Oracle Validates Integration Between HighJump Software's Supply Chain Execution Solutions and PeopleSoft; HighJump Speeds Deployment Time with Validation of PeopleSoft Supply Chain Management 8.9

HighJump Software, a 3M company, a global leader in providing supply chain execution (SCE) solutions, today announced that Oracle has validated the integration between HighJump's solutions and PeopleSoft Enterprise Supply Chain Management 8.9. By linking its Warehouse Advantage and Data Collection Advantage solutions with PeopleSoft 8.9, HighJump now offers the first validated integration of supply chain execution software with PeopleSoft.

This achievement stems from the ongoing relationship between HighJump Software and PeopleSoft solutions. The companies have collaborated since 1996 to design, develop and continually integrate to enhance their respective product offerings. It also represents another chapter in HighJump's history of being the only Oracle Certified Software Partner offering validated and tested integrations for all releases of PeopleSoft Enterprise Supply Chain Management, starting with version 7.5.

With a proven solution that seamlessly connects with PeopleSoft Enterprise 8.9 Supply Chain Management, HighJump solutions can help companies cut both the time and cost of integrating their supply chain infrastructure. The integration team validated over 50 transactions and integration touch points between PeopleSoft's and HighJump's solutions through PeopleSoft's standard XML interface.

"HighJump's rigorous commitment to integration with PeopleSoft Enterprise Supply Chain Management solutions has been outstanding," said Mark Israelsen, vice president, Applications Partnering Strategy, Oracle.

"We've been building our relationship with PeopleSoft for a long time and have provided great value for our many joint customers," said Chris Heim, president, HighJump Software. "We're excited about extending this relationship to Oracle and bringing outstanding value to Oracle's supply chain customers."

About the Oracle PartnerNetwork

Oracle PartnerNetwork is a global business network of 15,000 companies who deliver innovative enterprise software solutions based on Oracle software. Through access to Oracle's premier products, education, technical services, marketing and sales support, the Oracle PartnerNetwork program provides partners with the resources they need to be successful in today's global economy. Oracle partners are able to offer customers leading-edge solutions backed by Oracle's position as the world's largest enterprise software company. Partners who are able to demonstrate superior product knowledge, technical expertise and a commitment to doing business with Oracle qualify for the Oracle Certified Partner levels.

Oracle, PeopleSoft and JD Edwards are registered trademarks of Oracle Corporation and/or its affiliates.

About HighJump Software, a 3M Company

HighJump Software, a 3M company, is a global leader in providing highly adaptable, best-of-breed supply chain execution solutions that streamline manufacturing and distribution from the point of source through consumption. HighJump's tightly integrated solutions empower operational excellence in the warehouse and optimize the flow of inventory throughout the supply chain by facilitating collaboration with customers, suppliers and trading partners. These comprehensive solutions combine robust, standard functionality; a best practices-

based implementation methodology; and a uniquely adaptable architecture that facilitates fast, cost-effective system modifications. The result: a low total cost of ownership for more than 700 customers worldwide. As an independent subsidiary in the 3M family of companies, HighJump leads the SCE software industry in financial strength and delivers on an unmatched commitment to innovation and quality. HighJump leverages these advantages to continually expand its solution footprint and empower operational excellence for domestic and multinational customers.
