

## **3M Launches Fiber Dome Integrated Terminal/Closure for FTTx**

The new 3M fiber dome terminal/closure FDT08, which accommodates up to eight subscriber drops, is compact enough to be placed in small existing pedestals used for copper plant in overlay FTTP networks. It is a member of the full 3M family of innovative products for fiber optic OSP deployment. 3M is introducing this new product at the FTTH (fiber-to-the-home) Conference & Expo this week in Las Vegas.

Older technologies, while suitable for one-time, closure-type installations, are not suitable for FTTP fiber terminals because of the extensive installation time required and the inability to re-enter cable without disturbing the existing cable in a closure.

This 3M fiber dome terminal/closure has a restrictive access panel used to separate the access of different levels of craft from the splicing and drop termination areas. This feature enhances the cable plant reliability and protects the fiber optic splices from the elements, while providing fast and easy, no-cost re-entry. The built-in cable and drop-entry termination system permits re-entry into the terminal/closure without breaking the cable or drop seals.

The 3M-patented ECAM port design allows true plug-and-play capability which can reduce installation and labor costs because the cable and drop preparation and installation are completed outside of the terminal/closure body. Universal drop entry ports, which permit the usage of external and internal, ruggedized or nonruggedized, preterminated or field-terminated, spliced pigtail or spliced direct-drop cable terminations are part of the terminal/closure.

### **3M Telecommunications**

3M telecommunications products, technologies and services allow the world's service providers to offer high bandwidth connectivity from the central office into the customer premises with complete network solutions. The company's focus consists of technologies and services in telecom access and enterprise networks.

### **About 3M - A Global, Diversified Technology Company**

Every day, 3M people find new ways to make amazing things happen. Wherever they are, whatever they do, the company's customers know they can rely on 3M to help make their lives better. 3M's brands include Scotch, Post-it, Scotchgard, Thinsulate, Scotch-Brite, Filtrete, Command and Vikuiti. Serving customers in more than 200 countries around the world, the company's 67,000 people use their expertise, technologies and global strength to lead in major markets including consumer and office; display and graphics; electronics and telecommunications; safety, security and protection services; health care; industrial and transportation. For more information, including the latest product and technology news, visit [www.3M.com](http://www.3M.com).

3M, Scotch, Post-it, Scotchgard, Thinsulate, Scotch-Brite, Filtrete, Command and Vikuiti are trademarks of 3M.
