

3M Offers POS Touch Screen Monitor for High-Ambient Light Environments

3M MicroTouch M150HB High Brightness Touch Screen Monitor

3M Touch Systems Inc. announces the availability of the 15" 3M MicroTouch M150HB high brightness LCD touch screen monitor for point-of-sale (POS) applications in high-ambient light environments, such as garden centers, warehouse stores, transportation applications, front-of-store installations and most indirect-sunlight settings.

As a product-line extension of the popular 3M MicroTouch M150 LCD touch screen monitor, the ready-to-ship MicroTouch M150HB screen monitor features a 550-nit/500:1 contrast ratio display that can be twice as bright as industry-standard POS touch screen monitors (based on comparative 15" 250-nit displays).

The MicroTouch M150HB screen monitor is available with or without a stable monitor stand to allow for either counter or arm-mounted applications based on environmental requirements. The MicroTouch M150HB screen monitor comes in standard black color, is RoHS compliant, and is equipped with a reliable 3M MicroTouch ClearTek II capacitive touch screen and USB interface.

The MicroTouch M150HB touch screen monitor is now available from these leading POS distributors: BlueStar, Ingram Micro, ScanSource and SYNnex. For more information, visit www.3M.com/touch.
