

HighJump Software Cited as a Leader in the Warehouse Management Industry by Independent Research Firm

HighJump Software, a 3M company, a global leader in providing highly adaptable, best-of-breed supply chain execution solutions, today announced that Forrester Research, Inc. recognized HighJump Software as a leader in the warehouse management system (WMS) industry. Forrester Research evaluated leading WMS vendors across approximately 50 criteria for its report: The Forrester Wave: Warehouse Management Systems, Q1 2008, Forrester Research Inc. March 2008.

“HighJump leads in strategy and offers the most flexible architecture,” wrote Forrester Research analyst and report author Patrick Connaughton. “Its strengths include a well-architected and configurable workflow engine, a laser-focused product strategy, rapid implementation methodology, excellent versatility, and good support for value-added services.”

Forrester evaluated vendors based on current offering, strategy and market presence. HighJump Software received the highest score among all vendors in the overall strategy category, which included an evaluation of the company’s product strategy and vision, upgrades, and system integrator partnerships. In the current offering category, HighJump Software’s configurable product suite received top marks for features such as inventory management, receiving, wave planning, and postponement/value-added services.

“HighJump Software’s recognition as a leader in the increasingly competitive WMS space is a testament to the strength of our product suite and business strategy,” said Joel Levinson, president, HighJump Software. “HighJump Software’s flexible suite of products translates into a low total cost of ownership for our clients who are empowered to quickly and affordably keep up with fast growth and inevitable business change.”

About HighJump Software, a 3M Company

Forward-thinking companies entrust HighJump Software to power their supply chains. HighJump Software simplifies the art and business of creating, selling and moving products across global networks. Building upon 3M’s history of innovation, HighJump Software helps more than 1,300 clients worldwide drive growth and manage change. www.highjump.com
