3M Offers Top-of-the-Line Products for Mobile Workers at CES

3M to Showcase Innovative Screen Protector and Mobile Projector Solutions in Booth 30528

3M, a global innovation company, will be exhibiting at the 2013 International Consumer Electronics Show (CES) on January 8-11 in Las Vegas, Nevada. 3M will feature new products that help the mobile worker go anywhere and do more.

CES attendees are invited to come to 3M Booth 30528in the South Hall Upper 3/4 Level & Connector to have a free 3M Screen Protector applied to their phone Monday through Friday, from 11 a.m. to noon (PST) and from 2 to 3 p.m. (PST). There will also be opportunities to enter the 3M CES sweepstakes for the chance to win one of three grand prize trips, which include one trip to New York City, Napa Valley or Longboat Key, Fla. Daily sweepstakes drawings will also be held for the chance to win 3M products featured at the booth. For full sweepstakes rules visit 3M.com/CES2013.

Within the booth, 3M will be introducing the following new innovations:

NEW 3M Re-Attachable Privacy Filter for Tablets: 3M, a leader in innovative privacy protection, developed the Re-Attachable Privacy Filters for tablets as a response from consumer and business requests for an adaptable privacy screen protector that fits their flexible work habits. The re-attachable screen protector prevents "wandering eyes" from snooping on confidential or personal information by darkening side views, leaving onscreen data visible to only the person directly in front of the computer or mobile display. The patent pending design allows the privacy screen to be easily attached and removed from the device so consumers can share content on their screen when they want to but is re-attachable when privacy is needed. It will be available for the Apple® iPad® and Apple® iPad® mini in 2013.

NEW 3M 360 Privacy Screen Protector for Smartphones: For consumers looking for all around privacy protection, the 3M 360 Privacy Screen Protector offers privacy when viewed from both a landscape and portrait orientation. It will be available for the Apple® iPhone® 5 in Q1 2013.

NEW 3M HDMI Mobile Projector MP300: At 60 lumens, the latest, super portable, battery-powered 3M Mobile Projector allows road warriors to easily connect with a single HDMI cable to laptops and tablets and project, making it the ideal accessory for any sales person or business traveler who may not be sure where he or she will be presenting next.

Additionally, the following 3M product solutions will be on display at CES 2013:
