

3M Expands High-Performance Multi-Touch Product Offering with 21.5" Chassis

- New 21.5" projected capacitive chassis display delivers high-performance multi-touch interactivity for today's public environments -

3M Touch Systems, a wholly-owned subsidiary of 3M Company, today announces the availability of its newest high-performance multi-touch display designed specifically for interactive public applications, the 21.5-inch 3M™ Multi-Touch Display C2167PW. This commercial-grade chassis display is ideal for heavy-use applications that need high-performance multi-touch interactivity (20 touches, each at an ultra-fast 8 millisecond touch response rate), high-definition graphics (1920x1080 resolution and 178 degree viewing angles), and sleek, flat front surface industrial-design capability. In addition, the C2167PW chassis display is specifically designed for high-use public environments with a robust all-metal housing and an anti-glare touchscreen finish to help ensure premium image quality in public lighting environments. Complementing the C2167PW chassis display's commercial-grade design is its integration versatility which enables vertical (landscape or portrait) or horizontal installations in walls, kiosks, tables and other housing fixtures.

"The C2167PW chassis display is an important addition to 3M's multi-touch display offering," says Diego Romeu, global business unit manager, 3M Electronic Business Solutions. "This new display helps satisfy our customers' need for a commercial-grade, high-performance multi-touch display solution with a stylish flat front surface look and full HD resolution."

The 3M Multi-Touch Display C2167PW is based on 3M projected capacitive technology - the same touch technology found in smart phones and tablets - and features a stylish flat front surface design that makes it an attractive addition to any professional or retail environment. The C2167PW chassis display is plug and play with the multi-touch capabilities built into Windows 8 and other popular programming languages.

The 3M Multi-Touch Display C2167PW and the rest of the 3M Multi-Touch Display line is available from these leading U.S. distributors: BlueStar, Ingram Micro, ScanSource, SYNEX, and Tech Data, popular online retailers, and 3M's online store, www.Shop3M.com.
