

3M Introduces New Graphic Designs for Popular Welding Helmet

Tribute design honors fallen Navy SEAL while Future Combatant design appeals to video gamers

Style and safety go hand in hand with the [3M Speedglas Graphic Welding Helmet 100 Series](#) expansion. The series is now available with two additional graphic designs, called *Tribute* and *Future Combatant*.

The helmets provide wearers with the proven protection of the Speedglas Welding Helmet 100 Series. The *Tribute* collection boasts a patriotic look and feel, and was designed to honor a fallen Navy SEAL. The *Future Combatant* line of helmets asserts a futuristic appearance and is designed to remind wearers of the popular pastime of gaming. The new designs join 3M's other popular designs, such as *Aces High*, *Wild-N-Pink* and *Ice Hot*.

"With more than 15 designs to choose from, the Speedglas Welding Helmet 100 Series provides users with stylish alternatives to a plain helmet," said Kimberly Gates product marketing, 3M Personal Safety Division, "Many workers wear welding helmets every day and should have the opportunity to showcase their personality through this important safety equipment."

The Speedglas Welding Helmet Series 100 comes standard with a smooth 4-point ratchet suspension, excellent optical quality, and reliable light-to-dark switching. It is also available in a hard hat option. Through October 31, 2013, 3M is featuring a \$40 end-user rebate on the Speedglas Welding Helmet 100 series, and a \$60 rebate on the Speedglas Welding Helmet 9100 series. For more information on the rebate promotion, please visit: speedglasrebate.com.
