

# 3M to Offer Portable Breath Alcohol Testing Device

*Wireless, handheld device ideal for monitoring alcohol offenders*

3M announced today an agreement with Alcohol Monitoring Systems, Inc., (AMS) to market the company's SCRAM Remote Breath alcohol testing device. Featuring automated facial recognition and GPS location tracking, the handheld device provides corrections and law enforcement officers overseeing alcohol monitoring programs with a portable, wireless breath alcohol testing option.

"Our corrections and law enforcement customers were asking for a portable breath alcohol testing solution from 3M," said Angela Dreis, president, 3M Electronic Monitoring US. "We believe the SCRAM device is the best on the market today, and a great addition to our portfolio of industry-leading electronic monitoring solutions."

Notable features of the SCRAM remote alcohol breath testing device include:

Automated facial recognition software helps confirm whether the correct individual is taking the test  
Device-initiated testing automatically prompts users to take scheduled, random, and on-demand tests, helping reduce missed tests  
Ability to store and forward up to 48,000 test results, even when outside of cellular coverage area  
GPS location information capture for all missed and completed tests provides valuable data for the monitoring agency

## About 3M Electronic Monitoring

Since 1994, 3M Electronic Monitoring has been a developer and manufacturer of industry-leading GPS, RF and alcohol monitoring technologies, providing monitoring equipment and related field services for the corrections, law enforcement and security industries.
