

3M Files Patent Infringement Lawsuit in Korea to Protect Stacked Prism Film Products

3M Innovative Properties Co. and 3M Korea Ltd. filed a patent infringement lawsuit on June 19, 2015, in the Seoul Central District Court against LMS Co. Ltd.

The suit alleges that certain LMS Co. Ltd. light management film package products, including a light management film package product sold under the product name of "XLAS," infringe 3M's Korean Patent No. 1,074,570 titled "Method for Stacking Surface Structured Optical Films."

3M's microreplicated stacked prism films, including 3M Advanced Structured Optical Composites (ASOC), are integrated into LCD displays. The prism films direct light to enable a thinner and more energy-efficient electronic display.

3M is committed to protecting its intellectual property and investments in optical film technologies.

About 3M

At 3M, we apply science in collaborative ways to improve lives daily. With \$32 billion in sales, our 90,000 employees connect with customers all around the world. Learn more about 3M's creative solutions to the world's problems at www.3M.com or on Twitter @3M or @3MNewsroom.
