3M Files Patent Infringement Lawsuit against Amphenol

3M Co. and 3M Innovative Properties Co. filed a patent infringement lawsuit on April 3, 2017, in the District of Delaware against Amphenol Corporation.

The suit alleges that certain Amphenol data transmission cable products infringe U.S. Patent No. 8,933,333 titled "Shielded Electrical Cable," and U.S. Patent No. 9,601,236 titled "Shielded Electrical Cable."

3M's high-speed data transmission cables, including the 3M[™] Twin Axial Cable, improve the reliability and efficiency of energy delivery in high-performance computing environments. The 3M[™] Twin Axial Cable features a thin, foldable design that takes up less space inside dense server systems, allowing for maximum design flexibility while maintaining signal fidelity at high-speed data rates.

3M is committed to protecting its substantial investments in research and development, and in bringing new technologies and products to its customers, by obtaining intellectual property protection and enforcing its rights against unauthorized uses.

About 3M

At 3M, we apply science in collaborative ways to improve lives daily. With \$30 billion in sales, our 90,000 employees connect with customers all around the world. Learn more about 3M's creative solutions to the world's problems at <u>www.3M.com</u> or on Twitter @3M or @3MNewsroom.
